

Statement of **Volatility**

AOC Monitor Q27E4CV

The AOC monitor Q27E4CV includes both volatile and non-volatile components. Volatile components lose their data as soon as power is removed, while non-volatile components retain their data even after power is disconnected. The following non-volatile components are present on the Q27E4CV system board.

The chart contains a list of Non-Volatile Components on System Board

Component	Designator	Volatility	User Accessible for external data
NOR FLASH MX25L3233FM2I-08G 32M 8-SOP	U4002	Non-volatile	No
NOR FLASH GD25Q80ETIGR 8Mb SOP-8	U5702	Non-volatile	No
EEPROM M24C02-RMN6TP 2Kb SO-8	U5101	Non-volatile	No
EEPROM M24512-RMN6TP 512Kb SO8	U4003	Non-volatile	No

All other components on the system board lose data if power is removed from the system.
